ROCKY MOUNTAIN SOUNDS

Experience sound without boundaries with Convergence, a groundbreaking patch library for Omnisphere that transforms music into a timeless journey. Featuring 104 meticulously crafted patches and 57 unique sound sources, Convergence merges the warmth of analog synthesis with the beauty of organic textures. Designed for producers, composers, and sound designers, this collection empowers you to create music that resonates across past, present, and future.

Omnisphere 2 Installation

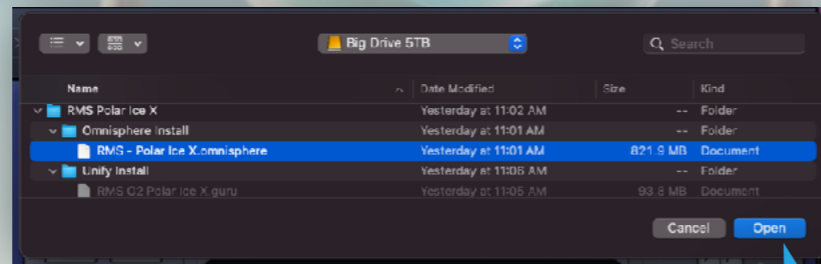

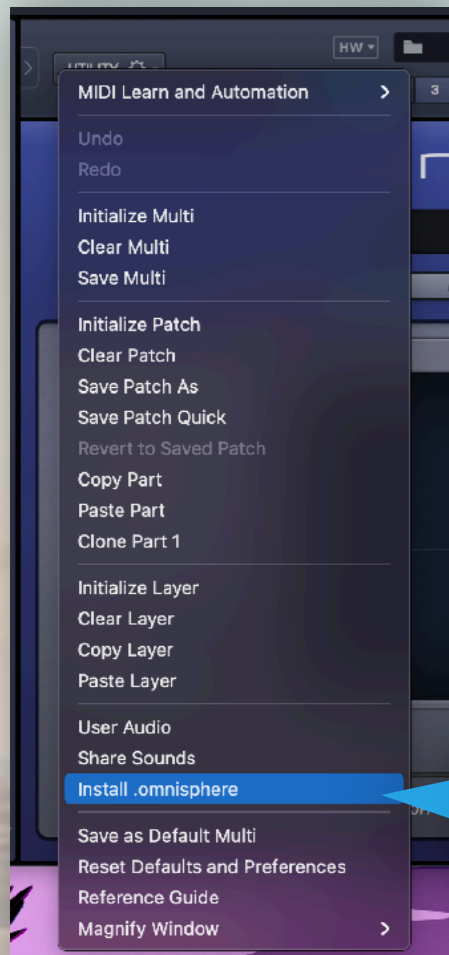

To install Convergence for Omnisphere 2, first open up Omnisphere 2 (the standalone version is ideal as it removes any possible issues a DAW or host may add). *Screenshots show Polar Ice X (also available from RMS). Select the **“UTILITY”** button on the interface as shown.

A. Scroll down and select **“Install .omnisphere”**

B. Navigate to the unzipped download folder, select the Omnisphere Install folder, then select either **“MUM - Convergence.omnisphere”** and click **“Open”**

C. Read the advisory notice and click **“Continue”**

D. This is the final step. The dialogue box will tell you the total number of multis, patches, and custom sound sources that will be installed. This is your last chance to stop installation. Clicking **“OK”** will install all the contents. After a short period of time, you will be able to start exploring your new sounds for Omnisphere 2!

With the latest versions of Omnisphere, a new feature is the ability to simply drag and drop a .omnisphere file directly onto an open instance of Omnisphere. This will install the library instantly.

Unify Enhanced

Unify is a revolutionary new type of instrument that lets you layer, play, and combine AU, VST, or VST3 plug-ins to create new, inspiring, and outrageously creative sounds. Not only can you load your own plug-ins, but Unify also ships with its own built-in library of virtual instruments and audio effects, making it immediately ready to use right "out of the box".

Latest Unify manual - <https://pluginguru.net/unify/manual/>

This collection includes a special .guru file located in the Unify Install folder of your download. The following visuals show Polar Ice X (available at RMS) but apply to Convergence.

To install, **FIRST make sure you have properly installed the .omnisphere master collection** - if you do not do this you will get errors with missing sound sources. Once installed, open up Unify (screen shot

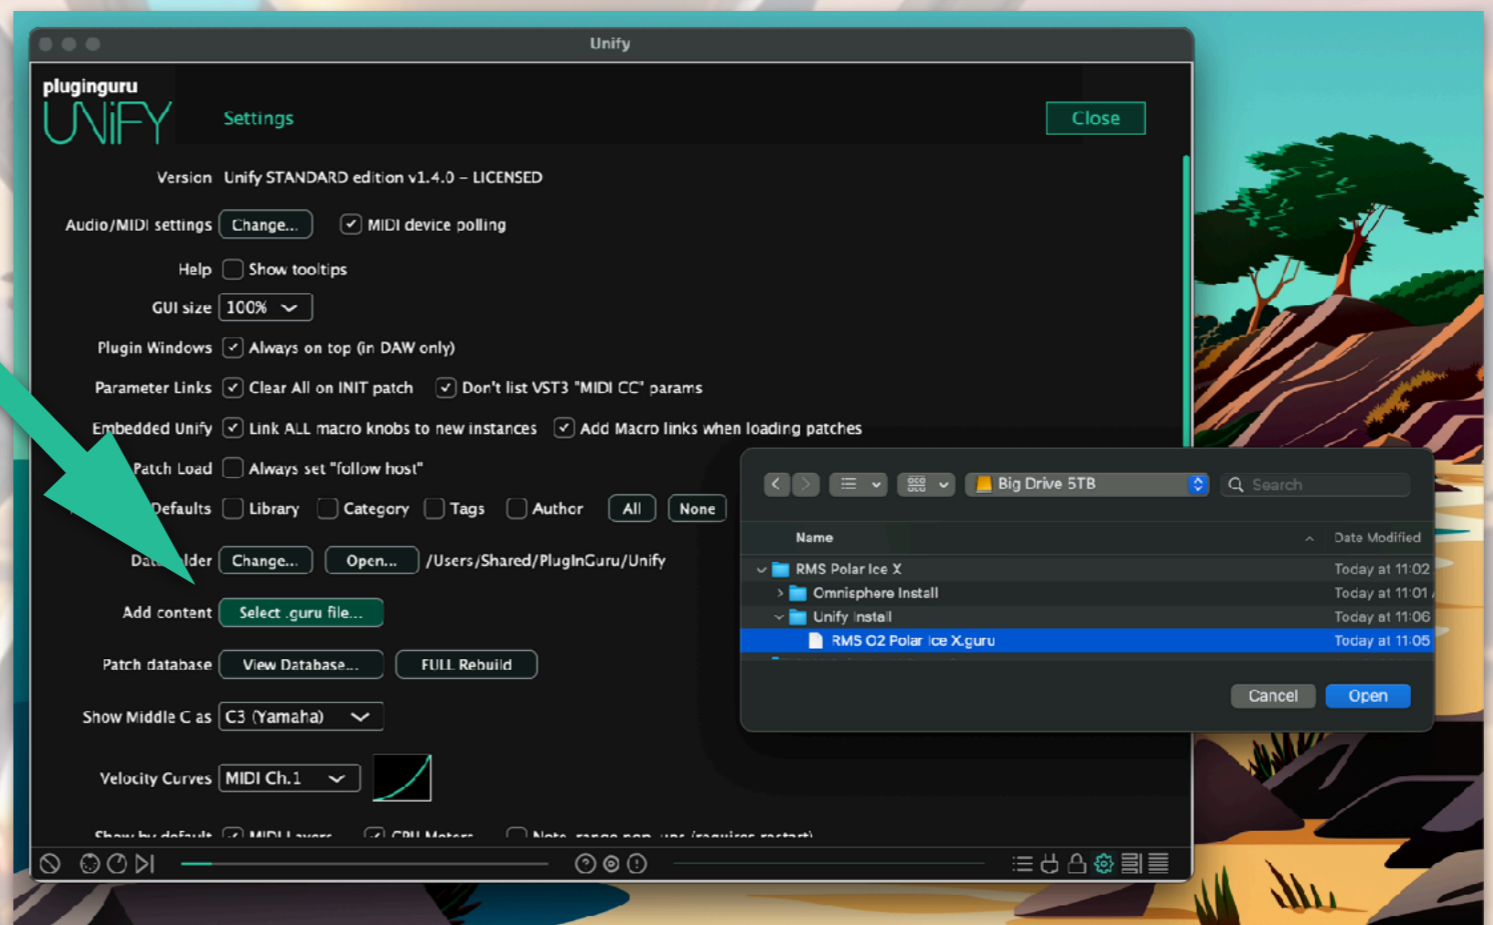

shows standalone version). Click on the gear icon to open up the setup menu

Click on the green "Select .guru file..."

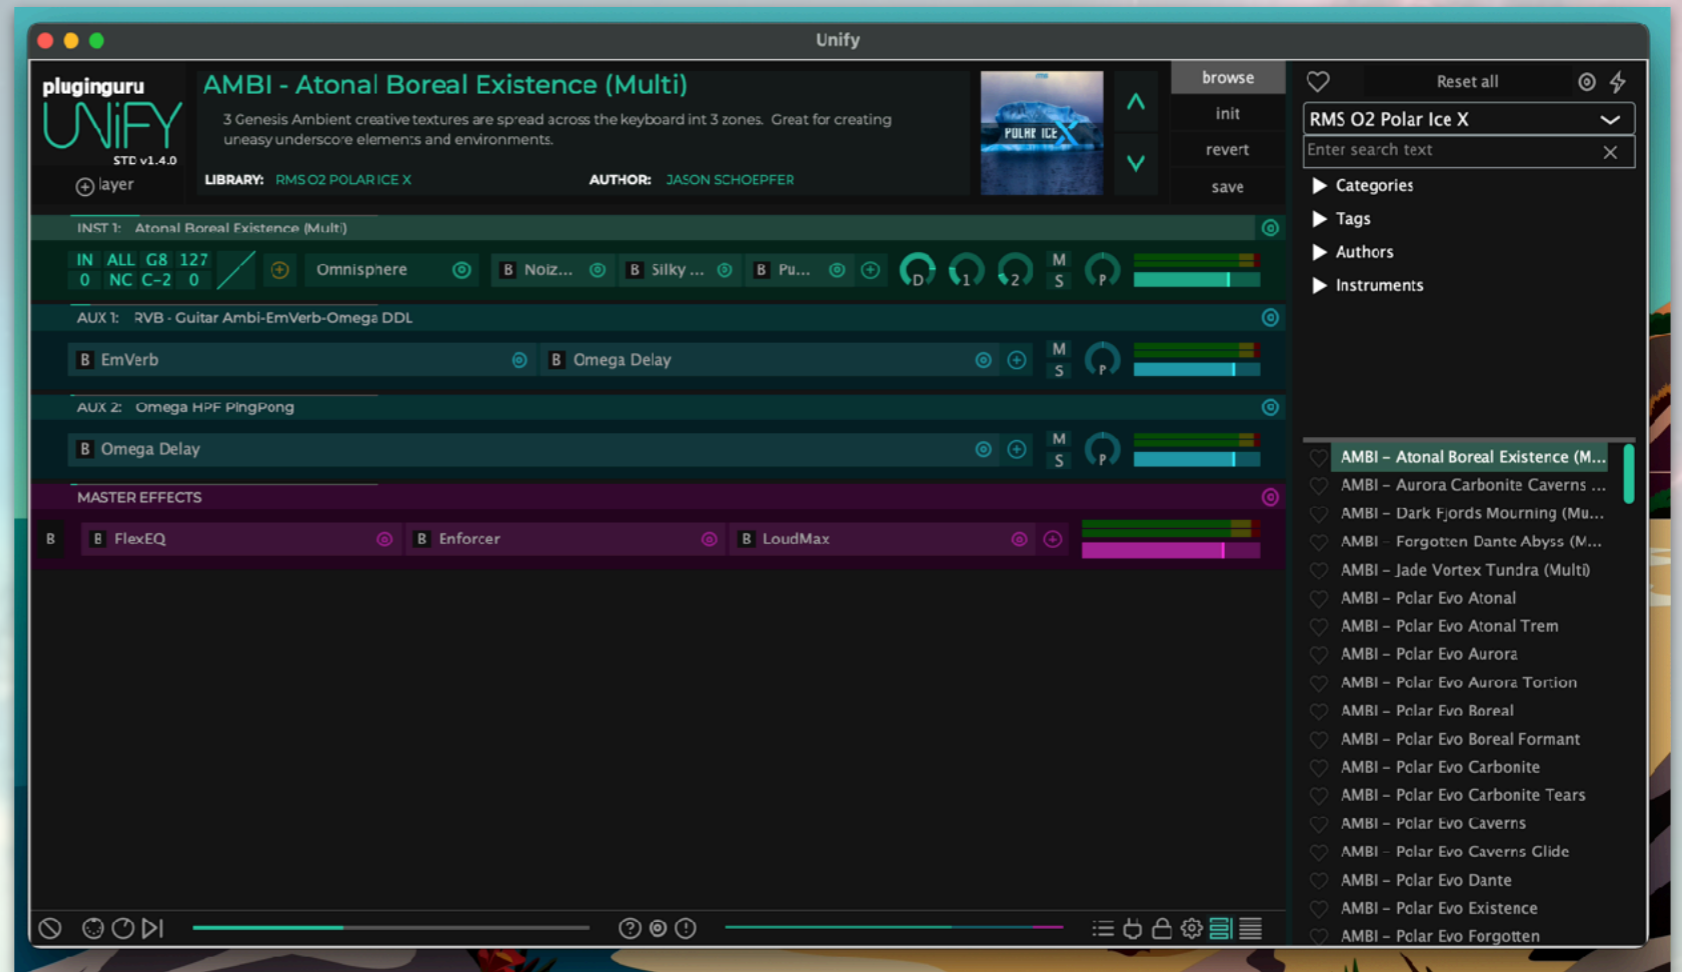

Navigate to the Unify Install folder and select **RMS O2 Convergence.guru**

Follow on-screen instructions.

You have now installed the Unified version of your collection and can now easily enjoy every patch found in the standalone Omnisphere version.

Each sound is mapped to the modwheel. If you click on the Omnisphere instrument box- this will open up Omnisphere.

Clicking on the macro knob icon will open up the macro knob panel - where each patch is mapped to creative FX like distortion, chorus, Pump House, reverb and delay. Explore these knobs as they can transform each sound in new and exciting ways (my personal favourite is Pump House - turn up the Pump Depth knob and enjoy!)

Easily combine patches together by SHIFT-CLICKING on new patches to insert the full Unify patch. It is an endless sonic exploration waiting for you to dive in! ENJOY!

The screenshot displays the Unify software interface for a patch titled "zSPLIT - Eastern Settlement". The interface is organized into several sections:

- Header:** Shows the "plugginguru UNIFY" logo, the patch name "zSPLIT - Eastern Settlement", and a description: "A fun combination of BPM bass, vox, arp pluck and mnc lead". It also indicates the library "RMS O2 POLAR ICE X" and the author "JASON SCHOEPFER".
- Instrument Tracks:** Five tracks are visible, each with a name (e.g., "INST 1: Juno One Oh Oh", "INST 2: Ukpik", "INST 3: Ambiduro PWM1", "INST 4: Circular", "INST 5: Sapphire Ahs") and a set of parameters including "IN", "ALL", "G8", "127", "0", "NC", and "C-2". Each track has a "B" button and a "P" button, along with a volume knob and a "M" button.
- Auxiliary Tracks:** Two tracks are shown: "AUX 1: RVB - Guitar Ambi-EmVerb-Omega DDL" and "AUX 2: Omega HPF PingPong".
- Master Effects:** A section containing "B FlexEQ", "B Enforcer", and "B LoudMax".
- Control Panel:** A row of seven circular controls labeled "CC1" through "CC7", with corresponding labels: "Filter FC+", "Dist Filter -", "Chorus Depth", "Pump Depth", "Pump Rate", "Unify Reverb", and "Unify DDL FC-".
- Right Panel:** A sidebar with a search bar, a "Reset all" button, and a list of categories and tags. A list of patches is shown, with "zSPLIT - Eastern Settlement" highlighted.
