MAN MAKES NOISE

OUTWORLDS

INSTALLATION GUIDE

Installation of Outworlds is a breeze.

After you have downloaded the files, unpack them anywhere on your hard drive.

Open Phase Plant.

Drag and drop the **manmakesnoise.outworlds.bank** and **manmakesnoise.outworlddrums.bank** into Phase Plant.

You're set to go.

Optional PlugInGuru Unify Enhancement.

Included with your download is folder called Unify Enhanced. This was created by Jason Schoepfer of Rocky Mountain Sounds (www.rockymountainsounds.com)

For owners of PlugInGuru Unify, after you have installed Outworlds for Phase Plant simply drag and drop both **MMN Phase Platn Outworld Drums.guru** and **MMN Phase Plant Outworlds.guru** on top of an open session of Unify.

Each Phase Plant patch has been imported into Unify, and a selection of useful Unify FX have been premapped to the macro knobs for instant creative adjustments.
