

AFTERGLOW

ROCKY MOUNTAIN SOUNDS

PATCH LIST

FOR OMNISPHERE 2 WITH KEYSCAPE

THANK YOU!

I appreciate your purchase of this special collection of samples and sounds for Spectrasonics Omnisphere with Keyscape. I hope you enjoy this collection that explores non-sustaining “afterglow” pads that are cpu-efficient and great for live performance. A lot of attention has been spent on the sound quality of the custom sound sources including recording in 24-bit, 96KHz for fantastic down stretching. Ambience Pads are also new and innovative and let you use Omnisphere in standalone mode instead of using hosts like Live or MainStage. I hope you are inspired!!!

Jason Schoepfer - Sound Designer and owner of Rocky Mountain Sounds.

Afterglow for Omnisphere 2 with Keyscape
